

How AI is Transforming Early Detection, Risk Reduction & Long-Term Outcomes

The Diabetes Problem

- 38.4 million people in the U.S. currently have diabetes
- 97.6 million have prediabetes, and 70% will eventually progress to diabetes
- Prediabetes increases the risk of microvascular & macrovascular complications, even before meeting full diagnostic criteria
- The American Diabetes Association now fully supports screening, early intervention, and lifestyle-based prevention

Proven Prevention Works

The landmark US Diabetes Prevention Program demonstrated:

- 58% reduction in onset of Type 2 diabetes with lifestyle modification
- 31% reduction with metformin
- Benefits lasting 20+ years
- Significant cost-effectiveness and long-term savings

Where AI Changes Everything

Recent studies show that an AI-delivered diabetes prevention program can match the effectiveness of current gold-standard clinical interventions — with major advantages:

AI Advantages:

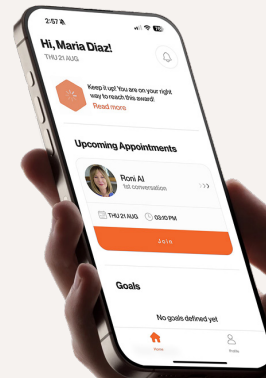

- Higher adoption and long-term engagement
- Ability to scale nationally at low cost
- Personalized coaching + real-time insight
- Consistent delivery without clinical staffing burden

“An AI-delivered program can be as effective as standard care while reaching more people at lower cost.”

Why Chronilogix Is Different

Unlike typical AI wellness bots, Chronilogix is built on 30+ years of Motivational Interviewing (MI) science, the same methodology Aetna scaled globally. Chronilogix digitizes MI so every employee gets a coach that is:

- Clinically grounded
- Culturally adaptive
- Available 24/7
- Proven non-inferior to human outcomes

How AI is Transforming Early Detection, Risk Reduction & Long-Term Outcomes

What AI-Based Prevention Looks Like

Feature	Benefit
24/7 digital coaching	✓ Constant support & habit reinforcement
Behavior tracking	✓ Identifies patterns early
Risk prediction models	✓ Prioritizes high-risk individuals
Personalized lifestyle plans	✓ Tailored to real habits, not generic guidance
Scalable delivery	✓ Reaches underserved communities

Bring AI-Driven Prevention to Your Organization

Help patients avoid diabetes, reduce long-term health costs, and expand access to life-changing preventive care.
