

The Challenge

Truck drivers face constant pressure—long hours, isolation, irregular schedules, and financial stress. The impact shows up where it matters most:

- Higher accident risk
- Driver burnout and turnover
- Inconsistent utilization
- Rising insurance and claims costs

Industry data shows:

- Drivers with multiple health risks have ~2.5x higher crash risk
- Fatigue contributes to ~13% of truck crashes
- A single injury crash can exceed \$300,000 in total cost

Even small improvements in driver well-being translate into measurable operational gains.

Why Traditional Solutions Fall Short

Most support systems aren't built for drivers:

- Limited access to care while on the road
- Long wait times and scheduling friction
- Low engagement with traditional programs
- Mental health often goes unaddressed

As a result, problems escalate instead of being managed early.

Chronilogix: Built for the Reality of Trucking

- Always available, no scheduling required
- Designed for mobile, independent work environments
- Scales across fleets without adding headcount
- Delivered at a fraction of traditional coaching cost

The Chronilogix Approach

24/7 AI-Powered Coaching for Drivers

Chronilogix provides continuous, voice-based support that drivers can access anytime, anywhere:

- No appointments or downtime
- Works on the road, between loads, or off-hours
- Built on clinically validated behavioral science
- **Supports:**
 - Stress, anxiety, and burnout
 - Sleep and fatigue behaviors
 - Chronic conditions (diabetes, hypertension, obesity)
 - Medication adherence and daily routines

What This Means for Your Business

Fewer Incidents

Better focus, reduced fatigue, and improved decision-making on the road

More Consistent Drivers

Lower burnout = improved retention

Higher Productivity

Healthier drivers = more reliable miles and fewer disruptions

Lower Cost Exposure

Reducing even a small number of incidents can generate significant savings

ROI Snapshot

For every 1,000 drivers:

- ~26 crashes per year (industry baseline)

Preventing just:

- 1 injury crash ≈ \$300K+ saved
- OR a handful of minor incidents = meaningful cost reduction

Chronilogix is designed to deliver these improvements at scale—without adding operational burden.
