

Chronilogix meets people where they are, across every gap in the care continuum.

LEVEL 1: First Line of Care

Where no other coverage exists
For the people who fall through
the cracks of traditional care:

- Rural communities with limited provider access
- Those who cannot afford deductibles
- Patients who have exhausted their covered counseling sessions
- Anyone in between scheduled appointments
- Available 24/7 when live coaches are not
- Bridges the typical 2–6 week wait for a human appointment
- Cost-efficient access for almost anyone

LEVEL 2: Hybrid Process

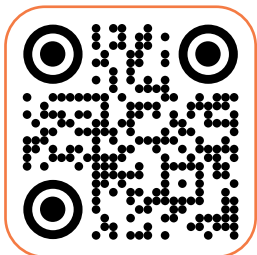

Human + AI, working together
Combines the depth of human
coaching with the consistency of AI:

- Extends the value of each appointment by supporting the patient in between sessions
- Continuously collects information for the therapist so no progress is lost
- Delivers cost efficiency and scalability without sacrificing quality of care

LEVEL 3: Digital Only

For those who prefer it this way
A growing category of cohorts who get
better outcomes with a fully digital coach:

- Certain ethnic and cultural backgrounds where a digital coach reduces barriers
- No bias, no judgment — consistent every session
- Uniform, reliable treatment regardless of provider variability
- The most cost-efficient option available

One engine. Three levels.
Every gap covered.
